EMBOCAPS® VG^α (ALPHA)

Thermogel HPMC Solution

The Highest Level of Clean Label

EMBOCAPS® VG ALPHA is a vegetable capsule which has been manufactured from Hypromellose(HPMC) using a proprietary thermal gelation process.

The EMBOCAPS® VG ALPHA, is crystal clear in appearance, and is manufactured to have a mirror smooth finish to allow easier swallowing; increasing consumer compliance and positive experience levels. As a non-animal based alternative, EMBOCAPS® VG ALPHA is suitable for products catering to a variety of popular consumer lifestyles and religious preferences.

Compatible with existing immediate release, or products already encapsulated in a thermogel capsule, the EMBOCAPS® VG ALPHA has a pH independent disintegration profile. The EMBOCAPS® VG Alpha can be customized with traditional or plant based colorants and printed. EMBOCAPS® VG ALPHA provides superior product protection, as these capsules are highly resistant to temperature and humidity excursions which help protect your finished product, even at the consumer level.

Advantages

- Manufactured using a Thermogel process.
- Easily dissolved in various liquids.
- Suitable for hygroscopic dosages.
- Low brittleness in low moisture settings.
- High mechanical strength with superior visual clarity.
- Benchmark level filling performance
- Non-animal, Non-GMO, preservative-free, gluten-free, and allergen-free
